Class, Culture and The Curriculum by Lawton, Denis

The organizations around the Benjamin Franklin Parkway will provide laboratories, libraries, and meeting space. Dialogue is more than conversation. Projects will have to be developed that incorporate and blend, implicitly or explicitly, the subject and process skills determined appropriate and necessary for the students involved.

As you envision the kind of diverse community, you and your neighbors may want to consider these kinds of questions.

Edutopia

By using the community as a classroom, we are in a position to use natural situational frames as a means for integrating learning and practice and fitting patterns of formal learning to local patterns of informal learning. The world is becoming increasingly diverse and includes people of many religions, languages, economic groups, and other cultural groups. Iberdrola USA: A Work in Progress The cultural sensitivity program at Iberdrola USA is evolving.

Learning about ethnic or racial cultures has been designated by those who are in favor of the ban as an activity that is best done through the family environment, separate from school sites. Students can interact and communicate with people through responsible participation in the full range of natural community situations that they might encounter as adults, and learn-through observation, reflection and practice-the skills necessary to effectively function in those situations.

Class, culture and the curriculum (1975 edition)

As long as they reflect the structure and social organization of the dominant society, they can be expected to perpetuate its values, attitudes, and behavior patterns within an implicit framework of assimilation. The option that has been proposed here is the project-centered approach, because it is flexible and adaptable to nearly any situation considered desirable for learning and can accommodate any form of knowledge or skills a community considers important for their children, with a minimum of cultural intrusion. Knowledge is multifaceted and simply reading tough books does not mean that students are engaged in understanding the complexities of any particular historical episode or time period.

INFLUENCE OF VALUES AND CULTURE IN CURRICULUM PROCESS

Students participated, according to interest and ability, in all aspects of the program. Davis that explained the relationship between race, poverty, and education in the United States. In that context, we may consider processes at two levels-in terms of process as content, and in terms of the processes of instruction.
