The Perspective on Abortion: Should it be a viable option?

And here Obama appeals to a grand tradition of religious pluralism that requires, in some significant way, a deliberative language that allows us to talk across sectarian differences. . So much so that in the blogosphere, there was this slideshow of Obama and Jeremiah Wright, Farrakhan and Jeremiah Wright, Obama and Jeremiah Wright, Farrakhan — it was this really interesting thing.

History of AIDS

And so among those folks who are living in resource-deprived communities, blackness is still circulating in particular sorts of ways — a certain kind of ministry continues to work, continues to have power. But if he decides not to attend a black church, learning the so-called lessons of his Trinity experience, is this an indication that we have truly arrived at a post-racial moment? But Byron, you can be the person to give us the — take us into the break — YORK: I want to move away from Reverend Wright.

History and the development aid debate in the Republic of Ireland

Before the 1980s, researchers estimate that about 100,000 to 300,000 people were infected with HIV. Unlike the individual patient focus of the clinical encounter, public health prevention and intervention programs are community-based. However, even here, specific groups, such as women, remain disproportionately at risk.

The history of AIDS exceptionalism

According to strict governmental regulations by the ADA act, people have the right to conceal this information.

The History of HIV: 1981

Whether these arguments will have any additional gravitas in our new recession is difficult to tell. But by doing so, they may in fact be guaranteeing that they will lose the argument in the public square. In 2003, the South African Government gave in to local and international pressure and announced its public treatment programme.

HIV and AIDS: An Origin Story

In 1983, the human immunodeficiency virus HIV was identified as the cause of AIDS. The debate over name-based reporting has focused on the need for more accurate epidemiological information regarding the spread of the epidemic-especially as antiretroviral therapies have proven successful in delaying progression to AIDS-versus concerns about deterring testing and the risk of discrimination. London: Nuffield Council on Bioethics; 2007.
