How was India involved in the First World War?

Africa, however, as well as several of the countries comprehended under the general name of the East Indies, is inhabited by barbarous nations. But the monopoly of the colony trade, so far as it has operated upon the employment of the capital of Great Britain, has, in all cases, forced some part of it from a foreign trade of consumption carried on with a neighbouring, to one carried on with a more distant country, and in many cases from a direct foreign trade of consumption to a round-about one.

Inglorious Empire: what the British did to India

The Spanish colonies, therefore, from the moment of their first establishment, attracted very much the attention of their mother country; while those of the other European nations were for a long time in a great measure neglected. He has only been five days in the place.

Llama Legends

At the port of London, indeed, it is commonly sold for ready money: the rule is Weigh and pay. In a country quite covered with wood, where timber consequently is of little or no value, the expense of clearing the ground is the principal obstacle to improvement.

Empire Day

The parliament of Great Britain has not, for some time past, had the same established authority in the colonies, which the French king has in those provinces of France which still enjoy the privilege of having states of their own. The city of Lima, founded since the conquest, is represented by Ulloa as containing fifty thousand inhabitants near thirty years ago. Their situation has placed them less in the view, and less in the power of their mother country.

Stories and Sagas

The constitution of those who have been born in the temperate climate of Europe could not, it is supposed, support the labour of digging the ground under the burning sun of the West Indies; and the culture of the sugar-cane, as it is managed at present, is all hand labour; though, in the opinion of many, the drill plough might be introduced into it with great advantage. It is not their business, and they have no regular means of information concerning it.
