Alexander McMahon Professor, Health Policy and Management, and Professor of Economics, Duke University, Co editor, Incentives and Choice in Health Care, Durham, NC D.

### **Incentives and Choice in Health Care (July 31, 2008 edition)**

Theoretically, ex ante moral hazard a reduction of preventive effort in response to insurance coverage is not unambiguously predicted, and there is very limited empirical evidence about it. The case for static ex post moral hazard an increase in the demand for medical care of a given technology is stronger.
