World War I Pfalz D.IIIa, Roden 015 (2000)

A service ceiling just shy of 20,000 feet gave it plenty of operating room once in the air. It got its name due to a peculiarity of its design: the short and long cabane struts that support the top wing.

Pfalz Flugzeugwerke

It was also one of the first aircraft to undergo regional variation, with additional radiators added to those serving in hot climates. III entered service in August 1917, but was not considered a match for contemporary designs like the , and instead found a niche role in attacking where its
