Labour Market Trends — CME

In the months prior to the COVID-19 economic shutdown full-time employment had reached record highs, while growth in part-time work was relatively flat.

The Labour Market in Atlantic Canada

Reuse our work freely All visualizations, data, and code produced by Our World in Data are completely open access under the. As the chart below shows, at the end of World War II, only 18% of people in the US thought that a wife should work if her husband was able to support her.

The Labour Market in Atlantic Canada

When one person takes that step, he or she leaves an opening that needs to be filled.

Nursing Statistics

The unemployment rate for minority women was 10. If we consider the sum of paid and unpaid work, women tend to work more than men — on average, 2. Recent data also suggests the downward trend may have come to an end with slight increases in seasonality in each province between 2012 and 2015.

Canadian Industry Statistics

Women and girls are responsible for water collection in 80 per cent of households without access to water on premises. Interestingly, in several countries with high levels of HIV infection Malawi, Namibia, Rwanda, Tanzania, Uganda, Zambia and Zimbabwe, the rural-urban gap is low, possibly reflecting the success of public interventions and awareness-raising campaigns in those countries. The Quarterly Journal of Economics, 128 2, 469-530.

Labour Market Trends — CME

Because this drop in youth participation coincided with the crisis and Great Recession, I cannot believe that everything we are seeing today simply represents people choosing to stay out of the workforce. This resulted in a rare situation where, despite strong employment growth, more people entering the labour force drove the jobless rate higher.

Working women: Key facts and trends in female labor force participation

In 2008, an estimated 141 million people living in urban areas and 743 million people living in rural areas relied on unimproved sources for drinking water.
