## “They Followed the Power of the Plant”: Historical Sami Harvest and Traditional Ecological Knowledge (Tek) of Angelica archangelica in Northern Fennoscandia

This family is subdivided into two sections or races, one with flowers having lips, or labiate, the other with flowers in a mask, or personate, for the Latin word persona signifies a mask — a very fit name, assuredly, for most of those whom we call persons. The plants described by these gentlemen from the Old Red Sandstone of Callender, I should suppose, from their figures and descriptions, to belong to the genus *Arthrostigma*, rather than to *Psilophyton*.

### Earth Facts

I had come to the hollow with the dog and the cat, but without the husband, children, or grandchildren. In most Member States, food supplements are subject to a notification procedure before being placed on the market.

### EBF\_Fact\_File

Theso leaves are said to be opposite. Thus in the Oak Fig

The following are the distinguishing features of the  $\alpha$  oxycelluloses as represented by the more extreme of the above mentioned products. In these the air circulating across the intercellular meatus of the leaves acts directly upon the pithy contents of the cells. To effect thia, vases or flower-pots of various forms are employed, which are filled with earth, and maintained at the necessary height, the branch being placed in it traversing the vase in contact with the soil, as in Fig. 82, The soil being maintained in a humid state, the portion of the branch in contact with it is not slow to push forth it« adventitious roots, which aro soon present in sufficient numbers.

**Vegetable World; Being a History of Plants, with Their Botanical Descriptions and Peculiar Properties by FIGUIER, Louis**

This means that not only in vivo data, but also other relevant information, including epidemiological, traditional usage, observational and in vitro data, should be taken into account when assessing the strength of the evidence.
