Global Biodiversity Outlook 5

The Report also presents a wide range of illustrative actions for sustainability and pathways for achieving them across and between sectors such as agriculture, forestry, marine systems, freshwater systems, urban areas, energy, finance and many others. Follow these recommendations to ensure your training initiatives are effective. Together with initiatives at various levels these have contributed to expanding and strengthening the current network of ecologically representative and well-connected protected area networks and other effective area-based conservation measures, the protection of watersheds and incentives and sanctions to reduce pollution.

Diversity management that works: summary of recommendations

Also identified as a key element of more sustainable future policies is the evolution of global financial and economic systems to build a global sustainable economy, steering away from the current limited paradigm of economic growth. The distributions of almost half 47% of land-based flightless mammals, for example, and almost a quarter of threatened birds, may already have been negatively affected by climate change.

Media Release: Nature's Dangerous Decline 'Unprecedented'; Species Extinction Rates 'Accelerating'

The magic of seeing fireflies flickering long into the night is immense. Practitioner expertise and stakeholder views are crucial for diagnosing issues and identifying potential solutions, but managers need to combine this with insights drawn from research and organisational data to help them make better-informed decisions and avoid bias from their own opinions.

Diversity management that works: summary of recommendations

Root out bias in job specifications and selection Biased hiring and promotion decisions are a major issue in promoting workforce diversity. With good progress on components of only four of the 20 Aichi Biodiversity Targets, it is likely that most will be missed by the 2020 deadline.

Media Release: Nature's Dangerous Decline 'Unprecedented'; Species Extinction Rates 'Accelerating'

It highlights the importance of, among others, adopting integrated management and cross-sectoral approaches that take into account the trade-offs of food and energy production, infrastructure, freshwater and coastal management, and biodiversity conservation.
