**The Capital Region: Regional Snapshot 2018**

The region boasts a large concentration of industries surrounding the technology sector and has maintained a high employment growth rate from 2007 to 2017, combined with high average wages. The dominance of that sector by cotton continued, but to a lesser degree than in the earlier period.

## Devastating Drought Settles on the High Plains

Since the 1950s, the aquifer has been pumped relentlessly, in part to water crops, and has fallen over 14 feet, on average. He said the group is unlikely to get involved in issues outside of Texas, especially at the federal level. The arms and space races with Cold War foe the Soviet Union led to creation of the NASA facility near Houston.

## Devastating Drought Settles on the High Plains

The apparent improvement could be misleading however.

## Devastating Drought Settles on the High Plains

To identify areas that needed attention, groups such as the generated detailed soil maps and took photos of the land from the sky. Nearly one-third of all migrants were professional or white-collar workers. He is the winner of two Society of Environmental Journalists reporting awards, one of the top honors in American environmental journalism: 2016 and third place for beat reporting in a small market 2014.

## **Devastating Drought Settles on the High Plains**

During early European and American exploration of the , this region was thought unsuitable for European-style agriculture; explorers called it the. After decades of overpumping, the Ogallala Aquifer, the water supply that this region has relied on since the 1950s, is gradually being pumped dry. The new owners then claimed that the territory's southwestern border was the Rio Grande known to Mexicans as the Rio Bravo.

## **The Capital Region: Regional Snapshot 2018**

Last 365 Days: Aug 6, 2007 through Aug 4, 2008. The DRS assigned the remaining cattle to the Federal Surplus Relief Corporation FSRC to be used in food distribution to families nationwide. Government response The greatly expanded participation of government in land management and soil conservation was an important outcome from the disaster.
