Assistant Clerk of the Illinois Pollution Control Board, certify that the Board adopted the above order on March 6, 2008, by a vote of 4-0. There are occasions where the department will request INHS through the statewide contract to conduct surveys throughout the state or a specific region to gather more data to further streamline consultation with the agencies. EPA is directed by Congress to coordinate the programs of all Federal agencies relating to noise research and noise control.

To comply with the National Environmental Protection Act and other state and federal environmental laws and regulations, special studies and assessments are conducted, and coordination with state and federal natural resource agencies is initiated.

## PART 901 SOUND EMISSION STANDARDS AND LIMITATIONS FOR PROPERTY

Any law enforcement office can enforce these regulations. Land uses evaluated for noise impacts include residential areas, schools, libraries, and parks or other recreational areas which may be affected by highway traffic noise. The assessment process is an integral part of project planning and development.

Transportation projects are assessed for the potential for impacts to floodplains, more specifically encroachments into the 100-year floodplain. IDOT also oversees and coordinates the activities of University of Illinois scientists and specialists located within the Illinois Natural History Survey, the Illinois State Archaeological Survey, and the Illinois State Geological Survey who conduct a variety of scientific surveys. A sole-source aquifer is one which supplies at least 50 percent of the drinking water consumed in the overlying area with no practicable alternative drinking water source.

5

The Board is an independent five-member Board that adopts environmental control regulations and decides enforcement actions and other

environmental cases in the State of Illinois. Results of the 2006-2007 survey suggest that the Indiana Bat is extinct from the northeast corner of the state.
