Surveys to measure tree damage caused by a western spruce budworm outbreak on the Carson National Fo...

.

Carson National Forest

The proposed action may include incidental removal of trees for landings, skid trails, and road clearing. Under the 2012 Planning Rule, plan revision involves three distinct phases: 1 assessment of the current conditions and trends of forest resources and multiple uses; 2 development of a revised plan; and 3 monitoring and implementation of the final approved plan. The applicant or holder must be in compliance with all the terms and conditions of the existing or expired special use authorization.

Surveys to measure tree damage caused by a western spruce budworm outbreak on the Carson National Fo...

As a minimum, the project or case file should include any records prepared, such as: The names of interested and affected people, groups, and agencies contacted; the determination that no extraordinary circumstances exist; a copy of the ; and a list of the people notified of the decision. Examples include but are not limited to: i Relocating an administrative facility to another existing administrative site; ii Construction, reconstruction, or expansion of an office, a warehouse, a lab, a greenhouse, or a fire-fighting facility; iii Surface or underground installation or decommissioning of water or waste disposal system infrastructure; iv Disposal of an administrative building; and v Construction or reconstruction of communications infrastructure.

36 CFR § 220.6

Activities within this category are intended to apply to facilities located at recreation sites managed by the Forest Service and those managed by concessioners under a special use authorization.

Examples include but are not limited to: i Accepting the donation of lands or interests in land to the NFS, and ii Purchasing fee, conservation easement, reserved interest deed, or other interests in lands. The proposed action may include incidental removal of live or dead trees for landings, skid trails, and road clearing. Examples include but are not limited to: i Decommissioning a road to a more natural state by restoring natural contours and removing construction fills, loosening compacted soils, revegetating the roadbed and removing ditches and culverts to reestablish natural drainage patterns; ii Restoring a trail to a natural state by reestablishing natural drainage patterns, stabilizing slopes, reestablishing vegetation, and installing water bars; and iii Installing boulders, logs, and berms on a road segment to promote naturally regenerated grass, shrub, and tree growth.

36 CFR § 220.6

Such activities: i Shall be conducted consistent with Agency and Departmental procedures and applicable land and resource management plans; ii Shall not include the use of herbicides or pesticides or the construction of new permanent roads or other new permanent infrastructure; and iii Shall be completed within 3 years following a wildland fire.

36 CFR § 220.6

Examples include but are not limited to: i Rehabilitating an NFS road or parking area where management activities go beyond repair and maintenance; ii Shoulder-widening or other safety improvements within the right-of-way for an NFS road; and iii Replacing a bridge along an NFS road. The Carson National Forest is currently in the process of revising its existing 1986 Forest Plan under the Forest Plan Revision Schedule. The Carson National Forest began revising its forest plan in 2014 using extensive and under the new planning guidelines.

36 CFR § 220.6

Activities under this category cannot include construction or realignment.
