### The Guppy Fish

The result shows that different groups of guppies have weak and variable food preference.

### Guppies for freshwater aquariums

Males are more colorful than females as well, so you will not miss out on keeping males only. Also alkalinity or anything that will heavily affect your water isn't very good for your fishies. Line breeding is defined as breeding fish and their offspring back to each other, so that specific desired desired by the human in control of breeding traits become the dominant traits in any offspring of the fish.
