### The deep population history of northern East Asia from the Late Pleistocene to the Holocene

Quaternary Science Reviews 26: 1197—1203. Acknowledgments Thanks to Glenn Milne, Joseph Kuchar and Sarah Bradley for supplying data and comments on the glacial rebound modelling.

### Geomorphological correlation of Late Pleistocene glacial complexes of Western and Eastern Beringia

During the last 5000 years, the lake level has continued to drop as the modern coastline developed. Trial excavation for cut and cover tunnel construction on glacial till — a case study from Dublin. An observational approach to the design of steep sided excavations in Dublin glacial till.

### Late

Soil Mechanics and Foundation Engineering, Dublin, 21-24 Delap, A. The extent and time-course of blanket peat erosion in Ireland.

### Relative Sea

Geological Society of America Bulletin 112 12 : 1834-1849.

### Geology, hydrology and land

Irish Journal of Earth Sciences, 17, 137. In The Quaternary History of Ireland, Edwards KJ, Warren WP eds.

### Pliocene to Holocene geomorphic evolution and paleogeography of the El'gygytyn Lake region, NE Russia

Global warming scenarios for Ireland and their implications for environmental management. Journal of Coastal Research 12: 664—672. On a Recent Bog-Flow in County Clare.

**Geology, hydrology and land**

Tearmann: Irish Journal of Agri-environmental research, 1, 1 : 65-77 Cruickshank, M. The sediments of the Ice Complex are characterized by poorly-sorted silt to fine-sand, buried cryosols, TOC contents of 1.

**Geology, hydrology and land**

Additional occasional publications appear as Supplements to the main journal. The assessment of slope stability for land use planning. Contrasting ecology of prograding coastal dunes on the northwest coast of Ireland.
