Doors, too, tend to get rusty edges particularly at the bottom and there may now be corrosion at panel joints around the massive black plastic bumpers. Karl has his Doctorate in Mechanical Engineering from Rennselaer and is well known around the world for his engineering contributions through many publications and patents.

Read Part 1 of our Rolling Restoration Series When beginning the restoration process, one of the first items of business is to complete a proper and thorough examination — an annual physical for the car, so to speak. Operating within a modern, well-equipped workshop, with the exception of paintwork and trimming, all other restoration activities can be undertaken in-house. I was also pleased to learn that Valdy has Koni shock absorbers, and we will hopefully be having these reconditioned.

**The restoration of vintage and thoroughbred cars, (Book, 1969) [sdk.mavlink.io]**

Engines were broadly the same as Rover V8s fitted to other cars - with low compression Range Rover pistons, and P5B saloon coupe details in some other respects.

However, I did find that whenever I took the car out I had to budget extra time to allow for answering the questions of all of the people that tended to inquire about the car when I was out and about on the roads. I hurried off the ferry, red suitcase in hand, and was instantly met by Dave on the other side of the glass petition.

So, how does the car stand up to inspection today? With a benchmark set, we began the process of dismantling the car so we could begin to really sink our teeth into the project.

### Specialists

Once I was satisfied that I had a good grasp on how the car was running, I began the formal inspection process. By the time we docked, I was so anxious — we had a very small margin of time to retrieve the car and load it back on the ferry to return to the mainland, and there was zero room for it not behaving itself.
