Older, weakened, or unhealthy trees may die not long after infestation. To account for this increase, the Librarian and Board President Traver Bayly made an appeal to the City Commission for additional space. The following pests, in particular, are notorious for damaging trees throughout Florida and nearby states.

Recommended Residential Trees

Trimming the roots does not harm a healthy plant and it appears that it helps stimulate the plant send up shoots to begin new plants. Many of these species are harmless, searching for food and shelter in local grasses and shrubs.
