BLM Technical Notes

These depleting resources are estimated to contain 951 bcf of the total helium resource base. All helium analyses were performed by mass spectrometric techniques. Since the early 1960s, when the U.

Helium resources of the United States, 1977 (Book, 1979) [sdk.navlink.io]

To date, approximately 54 billion cubic feet of gas containing approximately 39 billion cubic feet of helium has been injected into the center of the Bush Dome structure.

BLM Technical Notes

In general, natural gas resources have not been developed with the primary intent of extracting the helium.

BLM Technical Notes

In addition, technological innovations can occur over time that increase efficiency of use, and less-helium-intensive technologies can be substituted for current ones. Since then, however, Exxon Mobil Corp. Qatar has the third-ranked volume of conventional natural gas reserves in the world behind Russia and Iran and could be presumed to have large helium reserves as well Flower.

Since then, sufficient market and political forces have not conspired to be able to overcome the huge investment hurdle and incentivize development of a helium storage complex comparable to the FHR anywhere else.

Helium resources of the United States (1973 edition)

The helium resources base of the United States was estimated by the Bureau of Mines to be 894.

Federal Helium Operations

Leading up to completion of the FHR in the early 1960s, U.

Helium Resources Program

Federal lands Kornbluth ; McDonald ; Reisch ; Subcommittee on Energy and Mineral Resources.
