

# Clinical simulations in pediatrics

## Appleton-Century-Crofts - Simulation in pediatrics: Is it about time?

Description: -

-  
Host-virus relationships -- Congresses.  
Mammals -- Diseases -- Congresses.  
Viruses -- Reproduction -- Congresses.  
Parvoviruses -- Congresses.  
Anglo-Norman literature -- History and criticism.  
Anglo-Norman dialect.  
Ethnology -- New Guinea.  
Pediatrics -- Programmed texts.  
Pediatrics -- Case studies.  
Pediatrics -- Problems, exercises, etc.  
Clinical simulations in pediatrics  
-Clinical simulations in pediatrics  
Notes: Includes bibliographies.  
This edition was published in 1979

Filesize: 24.43 MB

### Simulation of Pediatric Life

Prebriefing includes an orientation to the environment, reviewing expectations, determining roles, and getting a patient report.

### Clinical Simulation

Our study adds to the growing evidence-base showing that SBE improves self-reported confidence of medical students in assessing and managing acutely unwell pediatric patients and can highlight and emphasize the importance of NTS in the clinical workplace. In collaboration with Oculus, a technology company, Sherman is diving into the world of virtual reality to design a VR resuscitation training program .

### Clinical Simulation

All caregivers of children who are 1 inpatient with a newly placed tracheostomy tube and 2 anticipated to start discharge teaching after the first date of Institutional Review Board IRB approval will be enrolled, regardless of home ventilator need. Telehealth education in nursing curricula. International Journal of Telemedicine and Applications, 461829.

### Pediatric Nursing Care Clinical Simulation Scenarios for Prelicensure Students

If home invasive ventilation is anticipated, a home ventilator will be used. The simulation manikin would be a high-fidelity pediatric manikin with moulage to look like a 3-year-old female.

### Clinical Simulation

In present times and in future, it is expected that simulation is used by practically every healthcare provider at some or multiple points in the training and certification process. This scenario regarding pediatric end-of-life care will provide nursing educators with a teaching tool to assist in bridging the theory-practice gap by allowing nursing students to practice in an environment that is safe. This Next Gen approach to learning and assessment is very powerful as learners collaborate and use game-based competition to become the best nurses they can be while providing faculty with just-in-time assessment data across the curriculum.

## **Clinical Simulation**

Student orientation consisted of two faculty members attending the class via the telepresence technology to discuss the project and explain objectives of using the technology during simulation. Take Your Students Directly to the Bedside With vClinical Virtual Simulations From Clinical Make-up to Exam Remediation to Clinical Judgment in every lecture, NurseThink® vClinical contains over 450 patient assignments requiring high level nursing care.
