Exotic Pests of Eastern Forests

The Kidepo valley only contains water in the wettest seasons. In total, 27,735 insect individuals were collected during both study years, including juveniles, damaged and lost specimens. However, 61 species were considered to be common, including 51 species of sap-sucking and 10 species of leaf-chewing insects.

Pests and diseases of forest plantation trees: an annotated list of the principal species occurring in the British Commonwealth.

International cooperation should be enhanced to prevent transmission of exotic organisms. The beetles fly from late May or early June through September. Flap-Necked Chameleon: You can find in the savannah and wooded areas.
