Mining in Canada

Canada must take steps to cement its status as a global mining leader, and to ensure that the industry continues to contribute to prosperity for Canadians. And then according to the decision made by the committee renewable energy should be produced.

Electricity facts

China in particular must come forward with a strategy to fight global warming as it has been declared as largest contributor to Carbon dioxide emissions according to the United Nations Organization breaching all national and international environmental standards. The oil industry's rapid growth in the 1950s, the controversy surrounding the construction of Canada's first 2 major gas pipelines the 1956 TransCanada contributed to the electoral defeat of the Liberal government the following year , and an acknowledgement that the government's information concerning energy matters was inadequate led in 1957 to the creation of the Borden Commission see to study Canadian energy policy. At the moment the is one of the largest government-owned reserves, with a capacity of up to 713.

Don't kid yourself, we're facing a made

Article published February 07, 2006; Last Edited October 20, 2014.

From Oil Crisis to Energy Revolution

Our researchers and scientists are striving to reduce the energy requirement needed to process bitumen both during extraction and upgrading thereby also reducing emissions.

2020

Proponents have said that it will create jobs and promote energy security in North America. New York and New England had experienced a large-scale blackout in 1965. Indigenous communities must also be supported to play a leadership role in conservation and restoration efforts.

Africa's Energy Crisis

The planet earth is suffering from disproportionate energy mix.

Canada needs a “green recovery” to confront COVID

These interests have traditionally pitted energy producers - whether of Nova Scotia coal before WWI, of Nova Scotia and Alberta coal between the 2 wars, or Alberta oil and gas since WWII - against energy consumers, the majority of whom live in Ontario and Québec. Third, those refined products would have to compete for a share on a flat or declining North American fuel market, where U.

1970s energy crisis

Extending a leadership record As in other countries, Canadian oil and gas producers industry groups have lobbied for financial bailouts and relaxation of regulatory oversight in response to the coronavirus crisis.
