As of early 1998 CSSC was considering the formation of three large shipbuilding groups which would be based in Dalian, Shanghai and Guangzhou. Adley has claimed that workers in the ship-repairing industry do not want public ownership of that industry.

Member for Bridgwater, especially now that he has been promoted, has to be much more careful. For the labour historian, shipbuilding and ship repair workers are of great interest for at least three reasons. In the course of these debates it was not infrequently pointed out to the Government that nationalisation was not necessarily the answer to the problems of the shipbuilding industry.

The shipyard experienced a final boom in the early 1970s but could not be saved from nationalisation and restructuring in the aftermath of the

OPEC oil crisis of 1973-74. Simulation for Safer Sailing Simulation assists the engineering of safer marine vessels and robust offshore structures with modeling of collision, sloshing, slamming, underwater explosive, structural strength assessment, vibration, noise performance, heat and cooling analyses, as well as antenna design. Early British dominance, for example, was later undermined in the 1950s by competition from the Japanese, who have since been overtaken by South Korea and, most recently, China.
