Still Moving: Between Cinema and Photography

Photographs stand as resolute and implacable grains of sand in the oyster of time—so sure of what they represent, yet forever trapped in place. To , photographers usually layer the images one on top of the another and mask out the undesirable parts. Some of these lens filters are manufactured with an actual hole in the middle instead of clear glass.

Still Moving: Between Cinema and Photography by Karen Beckman

There is no one right way to employ lighting design. Hard Light Hard light creates sharp and harsh shadows. A fill light is usually placed on the opposite side of the key light, and often not as powerful as the key.
