**Backers pump millions into oil well decommissioning pioneer**

As a mainly natural gas producer, Statfjord is scheduled to remain active until 2019.

Whilst the oil and gas industry provides work across the whole of the UK, Scotland benefits the most, with around 195,000 jobs, or 44% of the total. Specific initiatives now encourage industry-wide engagement and continued investment in asset integrity.

**Equinor begins UK drilling campaign Equinor begins UK drilling campaign**

Production from the Martin Linge field is scheduled to start in 2021.

**Number of abandoned wells overtakes fresh drilling, says OGA report**

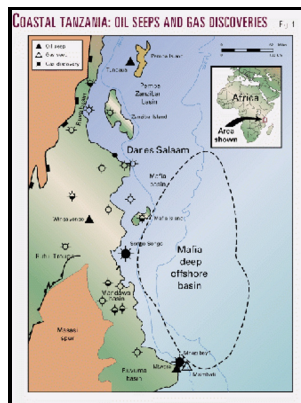

Sverdrup phase 2 will also supply other fields on the Utsira High with power from the shore. The exploration sidetrack failed to encounter hydrocarbons.

**National Geological Repository**

Despite the hardships, the ANP managed to keep the First Cycle of the permanent offer, which involves a continuous offer of fields returned and exploratory blocks offered in previous tenders that were not acquired or returned to the agency.

**Oil and gas industry in the United Kingdom**

The well is now expected to reach the Eocene reservoir target in early-mid October. Since 1970 the industry has paid almost £330 billion in production tax. If developments progress as planned, production could increase to 1.
