Global Communications since 1844: Geopolitics and Technology by Peter J. Hugill

To a state such as Japan, membership in the ITU offered linkages to the global network of telegraph cables and represented a version of international society in which Japan might be the equal of the treaty powers that had forced Japan in the 1850s into the European order of great powers and their domination. In the last twenty years, there has been a trend towards a more balanced evaluation of the relative freedom of information enjoyed under the Nationalist regime. How not to network a nation: the uneasy history of the Soviet Internet.

Telegraph Technology and Administrative Internationalism in the Nineteenth Century

In November 1972, pay TV caused expansion of cable when offered Home Box Office over its cable system. The external areas managed to remain outside the modern world economy, such as Russia.
