This was a fantastic book, and a great thing to read something about what our soldiers have done in Baghdad that wouldn't have been seen in the mainstream media. Kissimmee, FL: Signalman Publishing, 2010. The son of Greek immigrants who went on to achieve advanced degrees in law and classical studies, Bogdanos weaves together a detective story, adventure yarn and history lesson, committing himself to the investigation of

stolen artifacts and reflecting what he deems rumor and exaggeration among the media coverage and academics who claimed irrevocable archeological tragedy.

The level of information varied from label to label, but all the labels at least provided the provenance. I don't care if this book is for class I just can't do it anymore.
