### Report a COVID

Over the last 30 years, important advances in molecular techniques have led nucleic acid amplification-based tests NAATs to be increasingly used for identification of Plasmodium infection. They gave the substance in the extract the code name Bacinol after the species from which it was derived and to keep the Germans unaware of what they were doing. PLoS ONE 13 6 : e0198556.

### Investigation of laboratory confirmed Dengue outbreak in North

### Reagent and laboratory contamination can critically impact sequence

In the 1930s, Fleming had sent his strain to Johanna Westerdijk, the CBS director.

### Report a COVID

While the copy number initially reduces in tandem with increased dilution, plateauing after four dilutions indicates consistent background levels of contaminating DNA.

### Report on the first results of laboratory work on malaria in England

This was the second confirmed Dengue outbreak in Kenya, and highlighted the need for improved surveillance to better define disease burden and continuous education to medical personnel to improve detection and clinical management.
