The Role of Women in the Industrial Revolution

Aviation Jobs with Wings 1 of 4 At the American Airlines training school in Chicago, Illinois, an instructor shows two girls who are learning to become stewardesses how to serve meals in an airplane. Industrial Capitalism and the Changing Role of Women Women were not paid for work in the home. Mills of the Rhode Island variety expanded as well, and the earlier regional differences faded over time.

Women at Work in the 1950s

They put me on the bed for an hour or something, and then it was straight back to work after that.

The Mill Girls of Lowell

Seventy-eight hours are eighteen hours longer than sixty, and the sixty hours law is twenty years old.

Women in the Factory

Most pronounced was the control corporations exerted over the lives of their workers. Lowell visited mills in Great Britain and, on his return to Massachusetts, began efforts to reconstruct the power loom he had seen there. Technically, these cases involve only that section of labor law which forbids the employment of women after nine o'clock at night or before six o'clock in the morning; and that section only in its application to women over twenty-one years of age.
