However, a comparability problem of, e. IEF member Arthur Dahl contributed to this CSD indicators programme. Coercive isomorphism may influence sustainability reporting of public and stock-exchange listed EUC due to regulations and societal expectations and the need for organizational and public legitimacy ;.

## A temporal social resilience framework of communities to disasters in Australia

It is necessary for scientists from the social, economic and environmental areas, supported by the technological infrastructure that is widely available in their respective areas of knowledge, to take on the responsibility of preparing explicit constructs. According to Raynaut 1997, p. However, the higher maltreatment rates among single parents within industrialized societies and among cultures with polygynous marital forms in which women and children often live apart from the male parent suggest that social isolation may be conducive to higher levels of maltreatment.

## Development of indicators for the social dimension of sustainability in a U.S. business context

Resource extraction and infrastructure threaten forest cover and community rights. Recently, researchers have begun to study the relationships between maltreatment and neighborhood characteristics such as population mobility, neighborhood impoverishment, and unemployment.
