Application Of Workstudy

MEANS: How is it done? This is an 8 minute video from Komatsu America explaining the integrated support features as a part of their SMARTCONSRUCTION initiative: Yuichi Iwamoto, senior executive officer, CTO at Komatsu says that the company will use NVIDIA technology to create 3D visualizations of construction sites, including the real-time interaction of people, machinery and objects. This means that the probability is that 95% of the time the random observations will represent the facts and 5% of the time they will not.
