Social justice is analysed in the context of processes involving nationalism, social and public policy, globalization, diasporas, culture, gender, ethnicity, sexuality, welfare, poverty, war, and other social phenomena. The multidisciplinary journal offers a forum for biomedical and clinical researchers to share their work in research articles, case reports, clinical investigations, review articles and short communications. Readily reproducible techniques are provided, along with ancillary methods imaging, animal models, human genetic study design, and transgenic animal production that can be effectively applied to gene discovery.
