JAPANESE SWORD

There are those who feel this further separates the modern sword shinsakuto from the traditional sword. Interestingly, Hawley lists him as working in Tokyo in 1950, which was during the prohibition imposed by the allies. Regrettably, the landmark works, Gendai Toko Meikan and Gendai to Meisaku Zukan, are somewhat dated.

JAPANESE GENDAI SWORDSMITHS

This distinction is made by some, to indicate that contemporary swords are of higher quality than those produced in prewar times. This index is divided into two parts; known swords with star stamps on the nakago and a listing of Jumei Toshō smiths from literature sources.

Welcome

There are some, however, who suggest that the sword was never truly a primary weapon that honor being shared more appropriately by the bow and the spear, but rather a sidearm for personal combat. Three other indexes of swordsmiths, the Gendai Toko Meikan, the Gendai to Meisaku Zukan and the Toko Taikan have been translated and compiled by Tony Thomas. Granted, they are reported to have mixed western steel with native not using it exclusively, however, the fact remains that western steel was thought correctly or not to have added something to the sword, and appears not to have lowered the practical or aesthetic value of swords for clients or collectors.

JAPANESE GENDAI SWORDSMITHS

In The Craft Of The Japanese Sword, by Leon and Hiroko Kapp and Yoshindo Yoshihara, emphasis is placed on emerging styles of swords which are robust and perhaps more flamboyant and expressive of the economic position that Japan now holds in the world.
