Recent data suggest that neurosteroids, but perhaps not gonadal steroids, are important for the development of a male pathway from the song nucleus HVC to the robust nucleus of the arcopallium RA in the song circuit ;. However, some aspects of aromatase function may be more easily addressed in birds: Although it is difficult to compare findings generated using different assays and in different vertebrate groups , the data demonstrate that there is higher aromatase activity in the avian diencephalon compared to mammals.

Behavioral Aspects of Neuroendocrinology / Edition 1 by Detlev Ganten

To date, we have found that pubertal maturation—independent of the effects of age—influences both brain structure and brain function relevant to social reorientation.
