Elementary Grade K

Fifth graders keep records of investigations and observations and understand why they should not alter records. Events have been adapted to better align with our current reality of remote learning, social distancing and limited opportunities for face to face gatherings. This models the structure for middle and high school GASO.

Georgia School Reports

There are several ways to do that. New science materials, recently reviewed and approved by the Board of Education will be implemented according to the GCPS schedule.

Importance of Teaching Science in Elementary School

Yes, you can BEND WATER! Grade 6 lessons are aligned with the earth science topics required at that level, grade 7 has life science lessons, and grade 8 has physical science lessons.

Grade 2

We will NOT be hosting a State Science Olympiad Competition in 2021. This strong science program offers Advanced Placement biology, chemistry, and physics in most high schools. If any visitor to this site has an issue accessing information, please.
