Savings potential: Any project implemented

is implemented with an intention to gain any kind of tangible or say monetary benefits. The criteria views patients in their entirety, rather than by a single medical or psychological condition.

### Market segmentation criteria

I want to add my virus suspension to the cell culture and then observe under the microscope the changes the virus has caused on the cell shape and number.

### Criteria For Project Selection

For example, a person who speaks simple sentences, whose interaction is limited to narrow special interests, and how has markedly odd nonverbal communication. Can you envision examples of each? On a major, complex task you might choose to have 50 different attributes you are looking for in a good performance. I have seen many times, project leaders come up with simple ideas or improvements with a huge saving potential to the organization, but virtually no complexity involved.

### About the ASAM Criteria

. You had topic sentences that did not address the self-interest of your audience.

### Criteria For Project Selection

Appropriate tone; Clear sentences with varied structures; Effective diction. These dimensions should all be explicitly listed.

### **Criteria For Project Selection**

You provided an audience with a proposal, but there is some question whether your audience can act on it. This is why Availability of Resource is No. Having vanilla project can hardly be a criterion for project selection.

### **About the ASAM Criteria**

If your page lists the author credentials and its domain is preferred. If you can view the information properly--not limited to fees, browser technology, or software requirement, then.
