COVID

What environmental crises lie in store over those 5,000 days? For example, the structural adjustment programs imposed by the World Bank and the International Monetary Fund, the greatest single cause of poverty since colonialism, are never mentioned in the SDGs.

Earth Statement

Antarctica is managed under the 1959 Antarctica Treaty. Governments should also reinforce the roles and capacities of environmental protection and resource management agencies. Birth rates declined in industrial countries largely because of economic and social development.

Climate change and health

Until recently, such interventions were small in scale and their impact limited. There are no military solutions to 'environmental insecurity'.

Development Goals Can Work, Even Amid Crisis, But We Need to Measure Better

Collaborate on scientific inputs to high-level climate-related policy processes. Understanding how the ocean circulation and carbon cycle work is key to making more accurate predictions about future conditions. Public inquiries and hearings on the development and environment impacts can help greatly in drawing attention to different points of view.
