Publications

He did, however, have reasonable hopes of being able to predict eclipses over short periods. Had the method been more accurate, he had hoped to provide sailors with tables of the motions of the satellites, so that they could carry the standard time reference with them and determine their longitude on the spot. He estimated that it took eleven minutes for light from the Sun to reach the Earth.

The Galileo Project

Benedetto Castelli and the incompressibility of water, «Bollettino di storia delle scienze matematiche», XXVIII, 2008, pp. From Poleni to Volta, in Italian scientists in the Low Countries in the XVIIth and XVIIIth Centuries, edited by C.

Publications

Science in Bologna at the end of the XVIIth century through a debate on hydraulics, «Janus. The Sicilian astronomer Giovanni Battista Odierna published new tables in 1654, but these were again not accurate.

The Galileo Project

Peiresc now abandoned this effort. Observations of the Sun and stars were of no immediate help: in order to determine one's longitude with respect to, e.
