Early

The percentage of adults with reduced substance use at treatment discharge ranged from approximately 33 to 63 percent, depending on the substance. Three interrelated factors are particularly common barriers to seeking and receiving support among the parent populations discussed in this section: stigma e. Development of this resource was funded by the Public Health Agency of Canada, Government of Canada.

Mindful Practices to Enhance Diversity

And it's dependent on a lot of different factors. So, when we developed the pyramid, it was really designed so that any child who crossed your threshold could belong in that classroom and be supported.

Helping Children Feel Safe in Stressful Times

A quasi-experimental study of 43 mother-youth dyads 25 MST-BSF participants and 18 comparison dyads found fewer substantiated maltreatment reports and reduced time out of the home in the MST-BSF group. Schwarz and Getter 1980 found support for their hypothesis that the level of inter-parental conflict, parental dominance, and the gender of the adolescent were predictive of severe adolescent problems. For many underserved adolescents, pregnancy and parenthood represent an opportunity to enter a comprehensive system of supportive care that can address multiple needs for themselves and their children.

Nurturing and Attachment

Journal of Religion and Spirituality in Social Work: Social Thought, 30 3 , 212—233.

Promoting Powerful Interactions Between Parents and Children

Participants in evaluations of PCIT have been relatively diverse in terms of race and ethnicity. As with research on parenting in general, fathers are underrepresented in evaluations of interventions to support adolescent parents.

Targeted Interventions Supporting Parents of Children with Special Needs, Parents Facing Special Adversities, and Parents Involved with Child Welfare Services

AMERICAN JOURNAL OF PSYCHIATRY 140: 1543-1550.

Domestic violence as a form of child abuse: Identification and prevention

Funded by a grant from the National Center on Child Abuse and Neglect, Project Connect is administered by the Rhode Island Center for Children-at-Risk in Providence and operates under contract from the Rhode Island Department of Children, Youth, and Families. TA-FC has not identified specific parenting knowledge, attitudes, and practices that may be the active ingredient in reducing the likelihood of maltreatment, but pilot noncontrolled evaluation of the program demonstrates reductions in child problem behaviors ,.

How Exposure to Domestic Violence Impacts Child Development

There is evidence that parenting practices can either buffer or exacerbate the effects of intimate partner violence on children's behavior. If a mother relapses and has to leave, the village can maintain joint custody of the children, and the mother can regain custody later.
