Economics of Forestry and Rural Development

Focus is on the relevant economic theories and empirical studies to understand the integration process. Participants in the debate were in agreement that access to education, infrastructure, and public goods such as healthcare, and well-trained professionals is crucial.

Course Offerings

That way readers come away from the introduction with a clear idea of why they should be interested, what you do, what you learn, and how you build on the work of others.

Land use, forest preservation and biodiversity in Asia

These are not all randomized controlled trials.

Economics of forestry and rural development

This is relevant especially in a developing country context wherein the correct implementation of the legal framework is a key institutional driver of economic growth. Emphasis is on empirical investigation of these problems, though some conceptual material related to resource exploitation, rent distributions, and household economics is presented.

Land use, forest preservation and biodiversity in Asia

It considers all possible stakeholders—management, employees, customers, competitors, and broader community—as candidates for unity.

Land use, forest preservation and biodiversity in Asia

Key topics include market failure and externalities, economic functions of the environment, and meaning, conditions, and constraints of sustainable development. With its focus on reciprocity and respect for human dignity, it places the human person at the center of business and goes beyond corporate social responsibility or philanthropy.

How to Write the Introduction of Your Development Economics Paper

Economic development and forest use, with special emphasis on understanding the components of forest degradation and exploitation in developing countries, is the focus of this book.

Economics of Forestry and Rural Development: An Empirical Introduction from Asia. W.F. Hyde and G.S. Amacher (Editors), Agroforestry Systems

Forests provide a number of benefits such as regulation of global climate and ecosystems, provision of raw materials and wild foods for local communities, watershed protection for a region, national income from ecotourism, carbon sequestration, being a landscape and habitat of rare species.
