## Faculty participation in departmental decision

Policy Documents and Reports, 171.

## Faculty participation in departmental decision

To improve the accuracy of the estimates, I weighted the results of the study with design weights to account for the disproportionate selection across the different strata, nonresponse weights, and poststratification weights based on the prevalence of institutional control in the population since control was not used to define strata.

## Faculty Roles and Responsibilities

While postdocs may perform fairly routine laboratory work, they also typically focus at least some of the time on their own research and publications. However, three-fifths report at least that level of faculty authority for the selection of department chairs 60 percent.

## The 2021 AAUP Shared Governance Survey: Findings on Faculty Roles by Decision

Eligibility to Serve on and Vote in Elected Governance Bodies The question arises whether restrictions should be placed on the participation of contingent faculty in governance. But the routine exclusion of some faculty from department meetings, curricular planning, and other governance activities does much to foster the sense of inequity. However, concerns surrounding this trend have increased as support from traditional funding sources for large public universities, including research support, has declined.

## Faculty participation in departmental decision

Data on part- time faculty pay are still not available on a comprehensive national basis, but the large survey carried out by the Coalition on the Academic Workforce in fall 2010 provides the best recent information. Does a system in which only tenured or tenure- track faculty can decide upon election procedures that apply only to tenured or tenure- track faculty meet the standard of fairness? However, it is quite common for faculty

serving in contingent appointments to be hired by department chairs or administrators without the participation of faculty bodies and neither permitted to participate in the evaluation of other faculty nor thoroughly evaluated themselves.

### **Governance in US Universities**

At most institutions, faculty authority is consistent with AAUP-recommended governance standards in decision-making about programmatic, departmental, and institutional curricula; teaching assignments; and faculty searches, evaluations, and tenure and promotion standards. At virtual universities, faculty members may not teach so much as participate in creating instructional modules and provide feedback to students on their degrees of success in mastering specified knowledge. We now take up the other side of the question: whether faculty on contingent appointments should be expected or required to serve in such roles.
