## The Importance of Self

When you are in Self, you are grounded, centered, and non-reactive.

## Self Leadership: How to Develop the Skills to Transform Your Behavior

Here are some of his strategies: Celebrate: Apart from recognizing the points of resistance, you have to identify the points to celebrate. Knowing that they could use their money for other investments but they chose to use it on me, is one motivating factor and I want to try by all means to make them proud of me.

## Self Leadership: How to Develop the Skills to Transform Your Behavior

See: Awareness-Building Practices for Self Leadership Many practices can help us increase our awareness. This constantly shifting landscape represents peril and opportunity in equal measure, creating a new set of questions for executives. Passion The inspirational leader feels passionate about the vision and of the organization.

## The Influential Leader: Self

Tell them what to do, and they will surprise you with their ingenuity. Can a successful leader use criticism and judgment to influence another person in a positive direction? Right now I have goals, goals that I sometime doubt that I can achieve. What we as human beings are capable of doing with so little effort and what we can do with so much more.
