INDUSTRIAL ORGANIZATION AND PUBLIC POLICY. Not open to students who have credit for any other course in statistics, e. If people behaved irrationally, then there would be no chance in the world to predict their behavior.

Economics

The carrot is a benefit trying to make someone do something positive reinforcement while the stick is a cost trying to scare someone into doing something negative reinforcement. There are five fundamental principles of economics that every introductory economics begins with at the start of the semester: rationality, costs, benefits, incentives, and marginal analysis. For example people eat food, go to work, play nice with others, etc.
