PRINCIPAL INVESTIGATOR: David Kennell, Lewin-VHL, Inc., Fairfax, VA

Relative effectiveness and adverse effects of cervical manipulation, mobilisation and the activator instrument in patients with sub-acute non-specific neck pain: Results from a stopped randomised trial.

PRINCIPAL INVESTIGATOR: David Kennell, Lewin-VHL, Inc., Fairfax, VA

PRINCIPAL INVESTIGATORS: Jack McNeil, Bureau of the Census, Washington, DC Michele Adler, US Department of Health and Human Services, Washington, DC

I truly believe that it would be great help me to write my dissertation. Half received one or two of the following physical therapy modalities at each visit: soft tissue therapy, hot packs, electrotherapy or ultrasound.

IRSH: Mainstay Medical International plc: Final Results

The supplement will focus on the experiences of SSI disabled children and adults physically disabled, mentally ill, mentally retarded, developmentally disabled enrolled in the Oregon Health Plan. Botulinum toxin A BoNT has been extensively developed marketed and

implemented for decades demonstrating remarkable safety and efficacy.

PRINCIPAL INVESTIGATOR: James Conroy, Temple University, Philadelphia, PA

Recent basic research has reported encouraging Tau protective findings involving the ApoE gene.

PRINCIPAL INVESTIGATOR: Patrick Hennessy, Organization for Economic Cooperation and Development, Paris, France

These two States have received funds from the Robert Wood Johnson Foundation to carry out the demonstrations. The authors concluded that it was possible to conduct a manual-therapy RCT with concealed placebo, and the effect of CSMT observed in this study was probably due to a placebo response. The investigators concluded that a randomized controlled clinical trial in a similar patient base with a larger sample size is necessary to verify the clinical relevance of these findings.
