Actuators in injection systems: improving fuel efficiency and emissions

As a side benefit, it extends motor oil life.

Halderman & Linder, Automotive Fuel and Emissions Control Systems

Doing so may require the emission of some pollutants from the combustion system to increase if ATS performance is sufficiently high to still allow design target to be met. GDI engines have a higher tendency to produce small particle emissions that can be partially offset by refinements in fuel injection system design. Mass Air Flow Sensor MAF Finally, a monitors airflow that enters the engine.

How Diesel Emission Systems Work

In Texas, the is responsible for regulating emissions from -fueled rich burn engines but not gasoline-fueled rich burn engines.

Halderman & Linder, Automotive Fuel and Emissions Control Systems

Savvas Learning Company is a trademark of Savvas Learning Company LLC. In this article, we go over the way in which these devices work and the role actuators play in new electronic fuel injection systems.
