## Workplace Surveillance in Times of Corona

Several companies have developed machine vision software designed to augment existing camera systems to monitor people's compliance with social distancing rules.

## Patient monitoring in the future care context

Performance monitoring for development may have beneficial impacts on job satisfaction Ravid et al. Pursuit of these benefits has led to increasingly intertwined tracking—ingrained and ubiquitous—fed to management dashboards and optimization algorithms.

## Exploring innovative monitoring and evaluation practices tailored for gender

Companies with personnel around the globe must also devise a compliance strategy that affords the appropriate protections under global law while avoiding unintentionally enhanced privacy protections for U.

## Nutrition Information Management, Surveillance and Monitoring in the Context of COVID

Arrows depict the potential direction of the relationship e. Computer Based Monitoring: Common Perceptions and Empirical Results. As people adjust to minimizing the risk of infections in everyday settings, one critical context is work.

## the Behavioral Function of Work by Don H. Rohn

GPS location monitoring at Intermex. Journal of advanced nursing, 76 1 , 209-220.

## Workplace Privacy and Employee Monitoring

Union members should speak with a union representative if they have concerns about workplace video monitoring. Transparency has potential benefits, such as transparency of intentions leading to acceptance of surveillance Oulasvirta et al. Transparency of intentions decreases privacy concerns in ubiquitous surveillance.

### **Employee Monitoring Ethics: Considerations and Impacts**

The broader social dynamics of access to procedural and distributive justice examined through a fine grained approach to the study of workplace social relations, and workplace identity construction, are also important here.

### **Workplace Privacy and Employee Monitoring**

Federal law does not prohibit audio recording of phone conversations as long as one party on the call consents to recording. Washington DC: US Congress Office of Technology Assessment, 1986.
