The Asahi Pentax Way by Keppler Herbert

The camera is capable of metering between ASA 20 through 1600. Those two things are what keeps this camera at a 9 for me versus being a 10, but I still think I'd rather give up just about anything else in my kit than give up my SPII and it's kit lens.

Resolving Power of Takumar Lenses Resolving power of all Takumar lenses is factory-tested by skilled optical engineers. Nobuyuki Yoshida and Ryohei Suzuki, the Asahi designers, recognised the benefits of the SLR system over rangefinders for professional purposes, and sent the company into that direction from the beginning. Some people even have the meter recalibrated to the 1.
