Southeast Asia's Fisheries Near Collapse from Overfishing

There are many drivers for IUU fishing in the region, not the least of which is that demand now appears to exceed supply. Sea-farming can be especially helpful to small-scale fishery communities looking to shift into a more stable and sustainable livelihood, while expansion of freshwater aquaculture in inland farming communities can concurrently increase fish supplies sustainably. Southeast Asian Fish Products Fourth Edition, 2002 Fish is a major traditional source of animal protein in the Southeast Asian region.

Â To address this problem, the was created. When trawling started to expand in the 1960s, trawlers and traditional fishers got into violent confrontations over valuable shrimp stocks in the Straits of Malacca.

Fisheries

Our main objective is to maintain fish stocks important to commercial, recreational, and subsistence fisheries for long-term economic and social benefits to the nation. This variety creates unique viewing opportunities, experiences, and even challenges for those living in and visiting our region. We then calculate the average of the uncertainty percentages across all sectors, time periods, and countries to generate the upper and lower bounds for uncertainty.
