Instead, it has concerned itself primarily with building alliances designed to manage regional security more efficiently by proxy, while devoting increasingly more resources to homeland defense and intelligence aimed at stemming acts of terror by Islamic radical organizations and their followers. Maritime strategy is a subset of grand strategy, and the relationship between the two is ably defined by Professor John B. The paradox of the American experience is that the US is not simply a great power — it is an exceptional power, for which ideals count as much as strength.

It is important to highlight that there is very little possibility to switch our forces and resources between fronts applicable to both Army and Air Force while the Navy will need to be deployed along both the Arabian Sea and Bay of Bengal, and there will be almost total situational awareness with the adversaries given Chinese capabilities our own capabilities are moderate unless we persuade USA to chip in as Russia is likely to remain neutral. While deeply engaging with existing spacepower debates, Bowen also provides a pleasant bonus to the reader by slightly discussing issues such as the diffusion of military power and balance of power in his conclusions. The job of the policymaker, therefore, is to ensure America remains a great power, so that when the occasion arises, it can act as an exceptional power.
