Publikationen

Friday, 15 July 2016 An event to discuss experiences around private sector support for World Heritage will take place during the 40th session of the World Heritage Committee. Monday, 6 May 2019 Heritage Conservation is an evolving practice, and one of the current debates focuses on identifying and recovering the connections between nature and culture sectors. Title: Manure Management: Practices for the Minnesota Pork Industry Authors: Schmidt, David and Larry Jacobson Publisher: St.

Sustainable Agriculture in Print: Current Books, SRB 97

Pathways with large levels of land conversion may imply adverse side-effects impacting water scarcity, biodiversity, land degradation, desertification, and food security, if not adequately and carefully managed, whereas best practice implementation at appropriate scales can have co-benefits, such as management of dryland salinity, enhanced biocontrol and biodiversity and enhancing soil carbon sequestration high confidence. The lack of accumulated capital constrains household abilities to invest their little capital into CA activities under irrigation insecurity. Loans are often renewed, pushing households back in rice-farming and constraining the decision space for CA activities.

Items where Year is 2019

In particular, a larger proportion of beneficiaries are drawn from the poorest quintile i. A typical example can be seen in the Gambia where much government educated personal left for other companies that have a better pay. Long-term trends in intersectoral water allocation and crop water productivity in Zhanghe and Kaifeng, China.

Index

S86O89 1992 Annotation: Assesses soil and water degradation and damage to the international environment caused by growing population, overuse of resources, land tenure systems, trade and commercial systems, industrialization, climatic factors.
