Paradoxical inhibition of vasoconstrictor and vasodilator responses by hypertonic mannitol in isolated arterial smooth muscle

Furthermore, EGF-induced SRF activation was sensitive to the ErbB2 inhibitor AG879 in addition to the EGFR inhibitor AG1478 and we observed an EGF-induced downregulation of ErbB2 in A7r5 cells Fig. Various structural and functional variables as well as transcriptome changes, in vivo and ex vivo, were assessed. Clin Sci 130 1 :19—33.

Cell volume as a factor influencing electrical and mechanical activity of vascular smooth muscle.

All values were obtained at week 18.

Paradoxical inhibition of vasoconstrictor and vasodilator responses by hypertonic mannitol in isolated arterial smooth muscle

Albumin was determined by ELISA Bethyl Laboratories, Montgomery, TX, USA.

Cell volume as a factor influencing electrical and mechanical activity of vascular smooth muscle.

A variety of stimuli in addition to osmotic pressure changes and ECF volume aberrations increase vasopressin secretion. Renal parameters HFD led to increased serum creatinine and albuminuria in WT mice only Fig. The relevance of this potential compensatory hypertrophy has to be investigated in future studies.
