The status of developmental science: A review of a behavior analytic view of child development

Infant Behavior and Development, 11, 187—204. While parents do not cause these difficulties, impairments in social relatedness can strain parent child interactions and parental stress can have negative transactional effects that impede children development. Social and Emotional Development I: Attachment Relations.

The emergence of symbols: Cognition and communication in infancy. Piaget proposed an idea that seems obvious now, but helped revolutionize how we think about child development: Children think differently than adults. Cognitive psychology: Mentalistic or behavioristic? Cognitive development: Past, present, and future.

The status of developmental science: A review of a behavior analytic view of child development

Evaluating bifactor models: Calculating and interpreting statistical indices. For example, they make observations of children in natural settings such as preschools and engage them in experimental tasks.
