## Groundwater Management Area 6

Transmissivity of the aquifer ranges from 2,700 to more than 40,000 feet squared per day and averages 13,400 feet squared per day. THE SEYMOUR AQUIFER: GROUND-WATER QUALITY AND AVAILABILITY IN HASKELL AND KNOX COUNTIES, TEXAS: TEXAS DEPARTMENT OF WATER RESOURCES REPORT 226, V. The areas are predominantly in the Central Lowland Physiographic Province; only parts of the five westernmost areas are in the Great Plains Province.

## Conceptual Model for the Refined Seymour Aquifer Groundwater Availability Model : Haskell, Knox, and Baylor Counties

The aquifer generally has less than 100 feet of saturated thickness, but it is an important source of water for domestic, municipal, and irrigation needs. An estimated 120 million gallons per day was withdrawn from the Seymour aquifer during 1959.

## USGS Open

JOINT GROUND-WATER QUALITY PROJECT WITH THE TEXAS DEPARTMENT OF AGRICULTURE IN PARTS OF HASKELL, KNOX, AND STONEWALL COUNTIES: TEXAS WATER DEVELOPMENT BOARD REPORT 333, 1991. The Seymour Formation consists of clay, silt, sand, and gravel that were deposited by eastward-flowing streams. PRELIMINARY REPORT OF THE GROUND-WATER RESOURCES NEAR STAMFORD IN JONES AND HASKELL COUNTIES, TEXAS: USGS OPEN-FILE REPORT UNNUMBERED, 1944.

## Seymour Aquifer Water Quality Improvement Project

The objective of WQMP implementation is to achieve a level of pollution prevention or abatement determined to be consistent with State water quality standards. Assistance will be provided to the technician, when needed, by the TSSWCB Dublin Regional Office and NRCS. Conceptual Model for the Refined Seymour Aquifer Groundwater Availability Model: Haskell, Knox, and Baylor Counties Aquifer between about 1909 and 1934.

## **Seymour Aquifer in Haskell, Knox, and Baylor Counties Groundwater Availability Model**

WQMPs insure farming operations are carried out in a manner consistent with state water quality standards.

## **Groundwater Management Area 6**

Texas Water Development Board, Report No.

## **Scribblemonger Book Exchange**

The younger deposits are similar in composition to the Seymour Formation and compose part of the Seymour aquifer. GROUND-WATER RESOURCES OF HASKELL AND KNOX COUNTIES, TEXAS: TEXAS WATER COMMISSION BULLETIN 6209, 1962.
